

AntennaMatch

Datasheet

The SUMIT AntennaMatch is a fast and compact contactless reader and one port antenna analyser for Quality Control.

Technical Data

Operating frequency:	10Khz – 35 MHz
Resolution (minimum Frequency stepsize):	1Hz
Measurement time @ 10 KHz resolution:	max. 50us
Output Power:	-20dbm (unloaded) until +10dBm (loaded)
Power supply:	USB / Battery
Measurement Data Points:	2 to 10.000 Points
Marker & Marker search:	Statistics & min/max search
